MASPORT HEATING

Welcome to Glen Dimplex Australia, the home of Masport Heating. With over 35 years of experience in home heating, Masport heating is a brand that reflects its values through its product.

Superior build quality, extensive research and development, rigorous quality control and a guarantee of workmanship are values that are synonymous with Masport Heating. Glen Dimplex is the largest manufacturer of wood fires in Australasia and incorporates a high level of equipment and facilities unrivaled by any other manufacturer in Australasia. As a result, our product range is extensive and offers great value for money.

We at Masport Heating have in-depth knowledge of solid fuel heating and continue to invest a great deal of time and money into innovative wood fire design and development. Our range of wood fires are a result of our intense research and over the years we have been at the forefront of the new generation of clean burning ultra efficient fires. These are advanced appliances that provide reliable warmth to the entire house and all with an amazing degree of control, economy, aesthetic appeal and environmental friendliness.

Masport Heating is committed to producing the best solid fuel burners in Australasia and our confidence is reflected in our 10 year fire box warranty on our entire wood fire range. Rest assured that you are buying a quality product from a reliable and renowned wood fire manufacturer.

For more information, please view our latest range of products on offer in this catalogue or visit our website:

Made in New Zealand

Support our Kiwi neighbours and get a genuine Masport wood fire made in New Zealand.

Buying a Masport wood fire ensures you will have operational spare parts readily available for up to 15 years, this is a promise we have made to you. Our dedicated staff have collectively hundreds years of experience in the wood fire industry and are ready to assist you with your home heating needs.

Making a Masport wood fire is a team effort. We buy New Zealand made steel that's cut, crafted, welded and assembled by our team of over 90 Kiwis. This quality is made to suit homes all around the world, keeping your home and your heart warm this winter.

Why buy a Wood Fire?

- Wood is a carbon neutral product. Unlike other fuels, burning wood generates no more carbon dioxide (CO₂) than if it was left to decompose naturally.
- A wood fire is an energy efficient way of heating. They are designed to heat your entire house.
- A wood fire is also a multi-purpose fire. Apart from being your primary heat source it can be used in line with a heat transfer/ventilation system.
- It is a smart and cost effective method of heating. Running a wood fire is one of the cheapest forms of heating.
- Wood is a renewable energy source. Therefore making it a sound environmental choice.
- Whatever your heating requirement there's a range of models and options to choose from.

5 Great Reasons to Choose a Masport Wood Fire...

- 1/ Masport Heating is Australasia's largest wood fire manufacturer.
- 2/ All Masport wood fires comply with the AHHA Emission Standards (AS/NZS 4013)
- 3/ Huge range of environmentally friendly clean burning models.
- 4/ Fully brick-lined firebox with steel baffles for efficient heating.
- 5/ Comprehensive range of convection and radiant fires to suit a multitude of house designs.
- 6/ Firebox warranty up to 10 years.

FREESTANDING

ABOUT WOOD FIRES

In days gone by, people relied on solid wood fuel to provide the basics of life - for cooking, heating and hot water. Yet it was dirty and inefficient. How things have changed!

The research and development team at Masport Heating have dedicated years to improving the efficiency and performance of our solid wood fires. Masport Heating strives to produce appliances which exceed environmental standards, offer a range of styles and operate with efficiency never before imagined.

Today's appliances use less fuel, burn cleaner, are easier to clean, and can provide whole home heating even in the coldest winter without the fuss or mess.

ENVIRONMENTALLY FRIENDLY WOOD FIRES

Product researchers and developers have been working hard on addressing environmental issues for over a decade. Today's combustion systems meet even the most stringent world standards.

Simply put, burning wood is a sound environmental choice because unlike other fuels burning wood generates no more carbon dioxide than if it were left on the forest floor to rot. What's more, good forest management and regular replanting would ensure that our atmosphere is continually washed of carbon dioxide, while pruning and factory off cuts could provide an ample fuel supply for the entire country. With wood you know you are playing your part in protecting the planet.

To get the best out of your Masport Wood Fire, we endorse the following tips:

- 1/ Plan ahead - stock up on wood 6-12 months before intended use.
- 2/ Gather dense hardwood. Hard woods like Jarrah burn more slowly and require less refueling.
- 3/ Select dry hard wood as it makes the fire burn hotter and longer.
- 4/ Choose sound, solid wood - avoid rot and excess bark. A good way to tell if wood is ready to burn is to look for signs of radial cracking at the end of a log.
- 5/ Split larger logs to assist drying and burning.
- 6/ Never use seaborne driftwood, pine or chemically treated timber.
- 7/ Stack fuel loosely in a dry place so air can pass freely through the pile.
- 8/ Cover the top and two sides of the stack.
- 9/ Use fuel in order - the oldest and driest first.
- 10/ Have your appliance professionally checked and serviced before the Winter begins.

Guaranteed For 10 Years

As a sign of our commitment to quality, all new Masport fire boxes are guaranteed for 10 years. We warranty our fire boxes to be free from defects in material or workmanship under normal use and service. The Warranty (on the firebox excluding attachments) is for 10 years from the date of purchase.*

Please be aware Masport Woodfires are intended for internal use only, unless otherwise specified.

* 1 year warranty on all internal fire parts

Installation

When installed in the correct manner as shown, your Masport Fire will provide a cleaner, more energy efficient warmth. Masport Heating recommends that all installation work be carried out by an authorised installer.
