

 adf

ADF have a proud heritage with over 40 years of providing high quality and durable heating systems. Coupled with a sleek European design and manufacture, ADF brings the next level in quality and functionality to the linear wood heater options in the Australian market.

The unique automatic flue damper system significantly reduces smoke ingress to the room on re-fuelling (available on all models). The simplicity in design of the air wash and primary air system belies how well these beautiful fires operate.

NMR Freestanding Fire

NMR 820

- ✓ 5mm steel firebox with matching base
- ✓ High density vermiculite lining system
- ✓ Removable door tool
- ✓ Heats up to 200m² through natural convection and radiant warmth; boosted by an optional fan

Dimensions and Specifications

all dimensions are mm

Dimensions (WxHxD - incl. bench)	820 x 860 x 445
Weight	200kg
Heat Output (Nominal)	13.1kW
Approx. heat area	150 - 200 m ²
Efficiency	63%
Emissions	0.8g/Kg
Flue exit top fits to	200mm
Optional Fan	Yes
Hearth Dimensions - Thickness (Bellis Board or equivalent)	18mm

Hearth Dimensions & Clearance Options to combustible wall	Dimensions (WxD)*	Clearance
Parallel no shielding:	1070 x 1500	Sides 475 Rear 400
Parallel with 25mm thick Skamotec wall 1720mm (w) x 1200 (d):	1070 x 1275	Sides 475 Rear 175
Parallel with 180 x 900 s/s rear flue shield and firebox heatshields:	1070 x 1300	Sides 475 Rear 200

* Depth includes a min. 650mm in front of the unit.

Skamol Enclosure for fireplace enclosures

Skamol Enclosure is a light-weight, non-combustible building board that can resist temperatures up to 1000 degrees Celsius. This easy to install product simplifies the construction process by eliminating the need for steel or wood frame constructions. The result is a complete one product solution for your fireplace enclosure that solves a significant challenge facing dealers and installers today – recurring cracks and costly callbacks. When installed correctly, the Skamol Enclosure solution will virtually eliminate cracks.

One building product - multiple design solutions

Due to the strength of Skamol Enclosure, installers are able to apply various finishing materials, e.g. stone and tile. Multiple types of fireplace enclosures can be built using the product.

Most enclosures can be built using only Skamol Enclosure, replacing the need for light-frame construction and wall covering. This eliminates a complete stage in the construction process, combining multiple building materials into one.

Skamol Enclosure can be used for both traditional and contemporary fireplace installations.
